Thinking **INSIDE** the BOX

**5th – 7th
September 2024**

Padova Congress
(Convention Center)

Padua, Italy

Spotlight on Anaphylaxis – Thinking **INSIDE** the **Box**

The main innovation of GA²FA 2024 will be to develop a breakthrough thinking with an in depth appraisal for what already exists **INSIDE THE BOX** !

How can we maximize the GA²LEN Guidelines 2022 and many other guidance documents in the literature? How can we progress steadily in food allergy and anaphylaxis science in different context and with different, usually scarce, resources?

Focusing on the constraints around us, learning each plank **IN THE BOX** and practicing daily will ultimately allow us to move beyond – outside the box. Drawing in new ideas can be an effective strategy only if there are already clear parameters in mind, if there is a goal that the person or group is working towards.

All together jointly with the ANACARE Working Groups we will find the path to turn a problem into an opportunity unraveling any problem's potential. We will foster creativity (and will have fun...) solving the puzzles of food allergy and anaphylaxis diagnosis & management. Exploring the existing elements. We may end up removing some, multiplying others, reorganizing them and sometimes finding the solution in front of us.

The goal of changing the landscape of care for our patients is in **YOUR** hands: don't miss the chance to take part in this ambitious adventure at GA²FA 2024 with the ANACARE Working groups!

A global panel of Key Opinion Leaders have been chosen for the GA²LEN ANACARE Scientific Committee and GA²FA Faculty to fully cover the broad range of disease issues that will be highlighted during this comprehensive 2 and half day event. Local Experts will also be invited to join the GA²FA Faculty on the grounds of their renowned up-to-date knowledge.

We cannot wait to welcome you all at ANACARE GA²FA 2024!

Prof. Dr. Antonella Muraro
GA²LEN ANACARE CORE Leader

Padua, Italy

Prof. Dr. Dr. h.c. Torsten Zuberbier
GA²LEN President

Berlin, Germany

LIST OF GA²FA 2024 TOPICS

Challenges in diagnosing food allergy: role of CRD and Oral Food challenges: implementing the proper algorithm according to the context.

Socio-economic burden of food allergy and anaphylaxis across the world: report from the GA²LEN ANACARE Working group.

Does Cow's milk allergy still exist? Facilitating recognition of symptoms and timely management at the primary care level.

Holistic management of food allergy and anaphylaxis: are biologics fitting the role?

Nutritional issues in food allergy: role of processed foods, ensuring proper replacement and caloric intake, role of formulas for special needs.

Preventing food allergy: it is possible! Guidance for implementing recommendations at the primary care level and among patients (GA²LEN ANACARE position paper)

Increasing prevalence of food allergy: processed foods, microbiome,

The Thresholds issue: how much is safe? How can food companies navigate the landscape for adequately protecting the food allergic consumer?

Immunotherapy for food allergy: for IgE and non- IgE food allergy: where are we?

Which food for immunotherapy? commercial products vs baked food vs raw food: evaluation of different protocols and outcomes including economic analysis

Multifood Immunotherapy: ready for clinical practice?

LIST OF GA²FA 2024 TOPICS

Selecting the right patient and right product for food allergen immunotherapy: evaluating the regulatory issues in developing new products

New and old biologics in food allergy and anaphylaxis: outcomes of standing alone treatment and in combination with immunotherapy.

Food allergy at the community level: managing anaphylaxis and food allergy at school: GA²LEN ANACARE position paper.

The GA²LEN ANACARE White Paper on Anaphylaxis: outlining the needs for a community.

NEW Consensus Definition on Anaphylaxis: how to harmonize the language and implementing the consensus definition across the stakeholders.

Phenotypes of anaphylaxis: drug anaphylaxis v's hymenoptera v's food anaphylaxis

Defining Severe and Refractory anaphylaxis

Managing idiopathic anaphylaxis

The self-adrenaline auto-injectors: selecting the right dosage, the right device, and the right patient.

Educating on managing anaphylaxis in partnership with patient's organisations: who should do what?

Mastocytosis as risk factor for severe anaphylaxis: when to suspect and how to manage?

Regulatory challenges in dealing with food allergy and anaphylaxis in 2024: perspectives from EMA, FDA

Integrating a management care pathway for anaphylaxis: reporting from the GA²LEN ANACARE working group

Socio-Psychological impact of anaphylaxis among patients, families, and caregivers.
