CONFERENCE CHAIRMEN

Dr. Carlo Rainieri, National Research Council of Italy (CNR) Naples, Italy
Dr. Piervincenzo Rizzo, University of Pittsburgh, USA

LOCAL ORGANIZING COMMITTEE

Dr. Paolino Cassese, ITC-CNR
Dr. Alessio De Corso, ITC-CNR/Politecnico di Bari
Dr. Luigi Cieri, ITC-CNR
Dr. Maddalena Cimmino, ITC-CNR
Dr. Danilo Gargaro, S2X S.r.l.
Dr. Matilde Antonella Notarangelo, S2X S.r.l.
Dr. Daniela D'Adamo, S2X S.r.l.
Dr. Fabrizio Ricci, University of Naples "Federico II"
Dr. Ilenia Rosati, ITC-CNR

ORGANIZING SECRETARIAT

Ms Antonella Giuggioli, Collage S.p.A – Palermo, Italy

SCSHM EXECUTIVE COMMITTEE MEMBERS

Dr. Aftab Mufti, CEO, University of Manitoba, Canada
Dr. Doug Thomson, Associate CEO, Univ. of Manitoba, Canada
Dr. Farhad Ansari, EIC JCSHM, University of Chicago, USA
Dr. Wolfgang Habel, BAM, Germany
Dr. Yuguang Fu, Nanyang Technological University, Singapore
Dr. Rebecca Napolitano, PennState University, USA

LEAD SPECIAL SESSION ORGANIZERS

Carmen Amaddeo
Matthias Baeßler
Andrea Belleri
Numa Bertola
Francesco Cadini
Paolino Cassese
Eleni Chatzi
Marco Civera
Francesco Clementi
Christof Devriendt
Iván Díaz
Suzana Ereiz
Yuguang Fu
Pier Francesco Giordano

Hongren Gong
Alejandro Jiménez Rios
Roland Kromanis
Maria Pina Limongelli
Luca Lomazzi
Vincenzo Paolo Loschiavo
Abdollah Malekjafarian
Francesca Marafini
Alessandro Marzani
Paolo Mazzanti
Vittorio Memmolo
Yasunori Miyamori
Vahid Mousavi
Samim Mustafa

Yasutaka Narazaki
Andy Nguyen
Mayuko Nishio
Mohammad Noori
Didem Ozevin
Xiao Pan
Carlo Rainieri
Alessandro Sabato
John Sakellariou
Hesham Shehata
Yang Xu

Advanced sensing approaches

remote sensing, novel smart sensors, sensors for extreme environments.....

Data processing: data driven SHM methods, including machine learning and deep learning based approaches, physics-informed machine learning techniques for SHM

Physical principles monitoring: mechanical, acoustic, electrical, thermal...

Modelling and simulation

Energy: self-powered sensors, energy harvesting for sensor networks ...

SHM system design, and cyber physical systems: (maintenance, deployment...)

SHM-aided life-cycle performance assessment

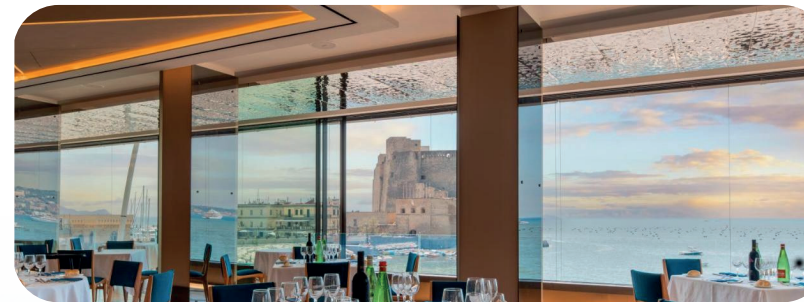

Smart cities and SHM for the Industry Internet of Things

Sensor networks/system integration:

SHM in action

The Proceedings of the Workshop
will be published in a volume by Springer

The Royal Continental Hotel | Naples

ABOUT

Naples

Set against the striking backdrop of Mount Vesuvius and the azure waters of the Mediterranean, Naples offers conference delegates a rare convergence of world-class research and unparalleled cultural wealth. Beyond the technical sessions, attendees can immerse themselves in a city that is a living museum of architectural and structural history. A short list of things to enjoy include a stroll along the scenic waterfront to visit the iconic Castel dell'Ovo (across the street from the Conference Venue), the monumental Castel Nuovo, the UNESCO-listed historic center of Spaccanapoli, the Underground Naples. Naples is also a culinary wonderland, including the birthplace of Pizza Margherita and traditional local pastries.

Abstract submission:
September 30, 2026

Abstract acceptance notification:
October 15, 2026

Paper Submission:
November 15, 2026

Revised Paper Submission:
February 15, 2027

Preliminary program:
February 15, 2027

Registration to include the Paper in the Proceedings:
March 1, 2027

Registration to include the oral presentation in the program:
May 1, 2027

Final program:
Second week of May (tentative)

ABOUT

the Conference

The SHMII-14 Conference embraces all the scientific and engineering disciplines related with structural health monitoring. The scope of the event is to facilitate a vibrating and stimulating environment to develop novel synergistic approaches to SHM, able to exploit the advantages of different technique whose combined application can also overcome the associated limitations. Held in a relaxing setting, the conference will connect academia and industry leaders to advance both the scientific knowledge and commercial applications of SHM. Furthermore, the technical and social programs are intentionally designed to enhance these interactions, promoting dialogue and cross-fertilization among researchers and practitioners from around the world.
